COMPARING CAMPUSES

Anyone who has visited any of the great college and university campuses has a visceral understanding of the scale and proportion that makes open space memorable. While we are able to recall individual elements of a campus, it is difficult to mentally compare the proportions or scale of an entire campus without graphic tools. We have assembled this collection as a tool for other college and university planners in the belief that shared memories and understanding of existing great spaces will lead to the creation of even better spaces in which to live and learn in the future. Our 1999 poster adds twenty-one more examples to our collection of college and university campus plans. This year's poster represents a cross section of large and small, public and private; and urban, suburban, and rural institutions. Visit our website at www.ayg-architect.com to compare our collection of forty-three campuses side-by-side.
