COMPARING CAMPUSES

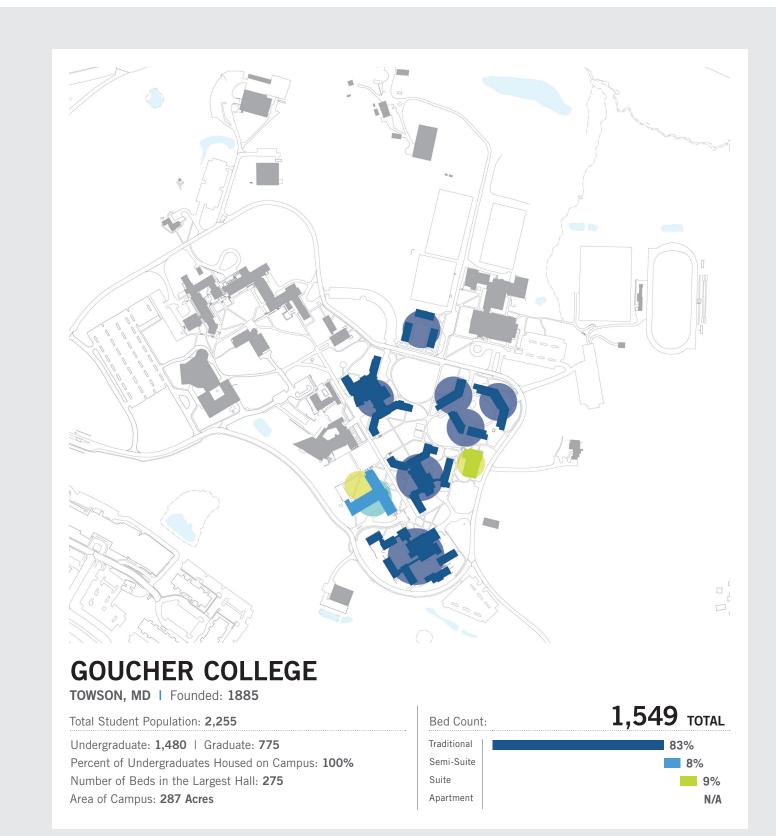

Student Housing

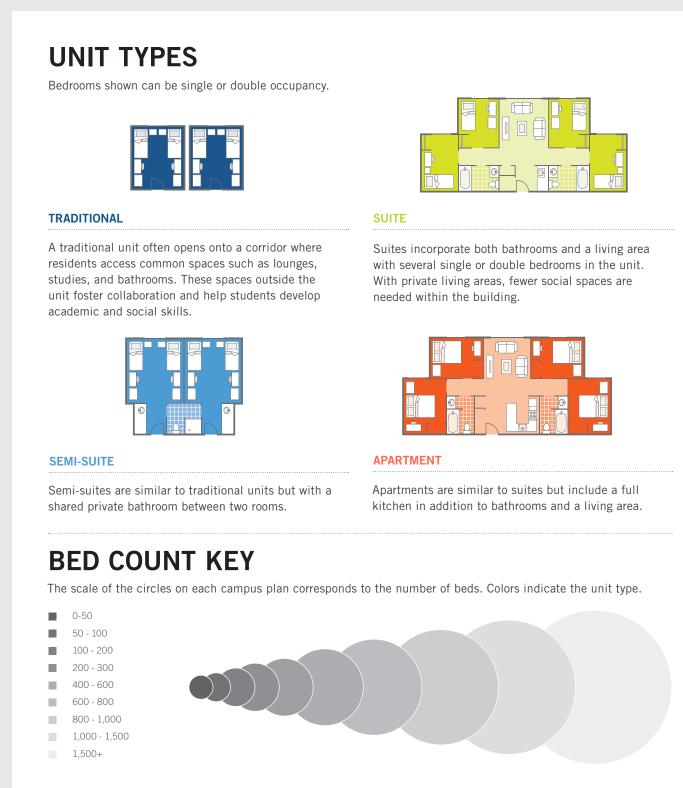

Housing plays an important role in the maturation of college students from the moment they first arrive on campus to the day they graduate. As students transition through their college experience, a variety of campus housing typologies are designed to align with their needs. The residential experience schools create greatly contributes to the university's

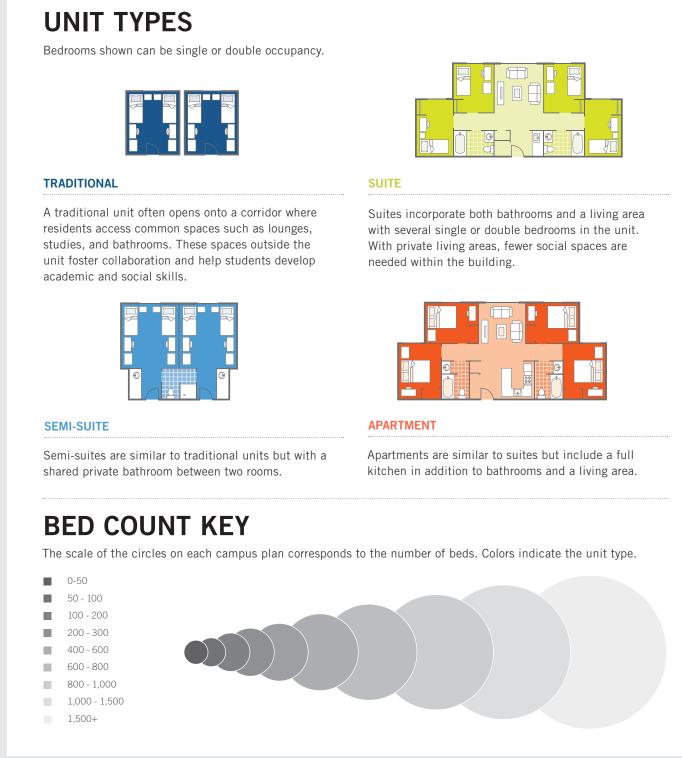

identity and strengthens recruitment and retention. Our 2018 poster compares on-campus housing typologies, densities, and distributions across ten campuses. Each map highlights campus-owned housing facilities color coded by the dominant unit type. A series of scaled, overlaid circles represent the number of beds within each building. In some cases, we grouped a series of buildings with relatively

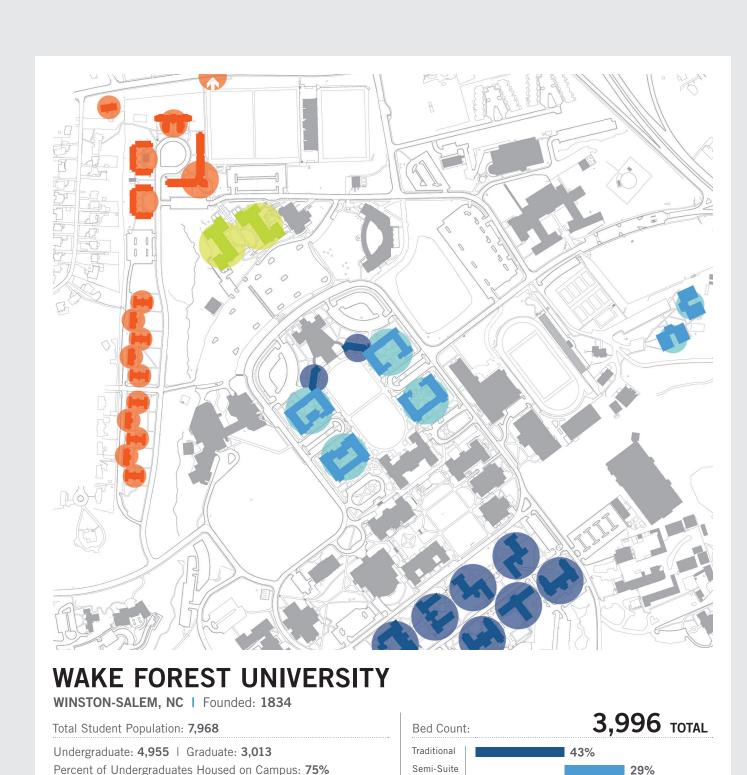

For 20 years, Ayers Saint Gross has gathered broad data on the physical characteristics of campuses. The Comparing Campuses collection now exceeds 200 campuses and is available on our website at www.asg-architects.com. Our thanks to the institutions featured on this poster.
